

## PROJECT PROFILE

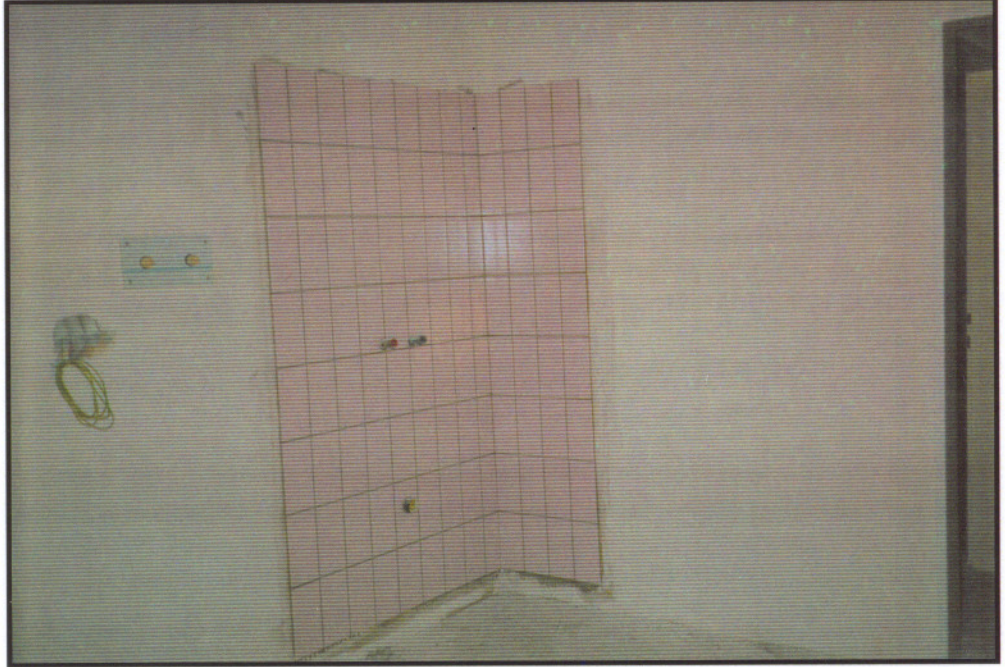

**PROJECT:** Wall Protection in a Hospital

**LOCATION:** Austria

### THE PROBLEM

Hygienic and sterile surfaces are essential in any hospital. It is also essential to have surfaces that are easy to clean and maintain.

New examination rooms were being built in this hospital and it was vital to provide the hygienic wall protection required. With our range of water-based and solvent-free coatings, the customer was confident that Thortex would be able to provide the right products.

### THE SOLUTION

Once the wall surfaces had been prepared, one coat of Uni-Tech GP Primer followed by two coats of Wall-Tech WB were applied.

The Wall-Tech WB system is ideal for use in hospitals as it provides an aseptic finish which is also hard wearing and easy to clean and maintain. The customer is particularly pleased with this systems ability to withstand impact as well as the very smooth finish achieved.
